

## Providing a Comprehensive Benefits Package

Medical coverage may be the first item that comes to mind when you hear the word “benefits.” However, there are more options that needs to be considered.

Automatic Data Processing Insurance Agency, Inc. (ADPIA) can offer businesses a complete solution for health and benefits. We are ready to advise you on cost-effective strategies for supplementing your medical coverage. The result can be a comprehensive health and benefits package that may help you to attract and retain valuable employees, all while enabling business growth.

### WHO WE ARE

At ADPIA, we’ve developed a client base of over 100,000 small and mid-sized companies. Our reputation has allowed us to build partnerships with both national and regional insurance carriers, providing our clients with access to a range of innovative and competitively priced plan options that fit their unique and evolving business needs.

### Dental Coverage

Proactive dental care is an important component of the overall health and well-being of your employees. Through regular dental check-ups, problems can be identified and addressed before they require complex and costly treatment.

### Vision Coverage

Poor vision or undiagnosed eye problems can negatively impact a person’s quality of life, as well as productivity on the job. The American Optometric Association recommends periodic eye exams to protect vision.

### Group Life Insurance

Group life insurance coverage can provide individuals peace of mind that their financial responsibilities will be met in the event of a tragedy. Guaranteed issue group life insurance can be valuable to both you and your employees as part of a long-term financial planning strategy.

### Short Term and Long Term Disability

Unfortunately, the risk of becoming disabled is greater than one might think. It’s estimated that 1 in 4 of today’s 20 year-olds will become disabled before they retire. Factors such as excess body weight, high blood pressure, and tobacco use may increase the risk.<sup>1</sup>
